AUTHOR INDEX VOLUME 9 (1990)

The issue number is given in front of the page numbers

Barzilai, J. and B. Golany, Deriving weights from pairwise comparison matrices: The additive case (6) 407–410
Benmerzouga, A., *see* J.G. Wilson (3) 203–209
Benson, H.P., Separable concave minimization via partial outer approximation and branch and bound (6) 389–394
Bertsimas, D.J. and G. VAN Ryzin, An asymptotic determination of the minimum spanning tree and minimum matching constants in geometrical probability (4) 223–231
Boros, E., Y. Crama and P.L. Hammer, Upper-bounds for quadratic 0–1 maximization (2) 73– 79
Carraghan, R. and P.M. Pardalos, An exact algorithm for the maximum clique problem (6) 375–382
Chaudhuri, P., An adaptive parallel algorithm for analyzing activity networks (1) 31– 34
Cidon, I. and M. Sidi, Recursive computation of steady-state probabilities in priority queues (4) 249–256
Coffman, Jr., E.G., G. Fayolle, P. Jacquet and P. Robert, Largest-first sequential selection with a sum constraint (3) 141–146
Crama, Y., *see* E. Boros (2) 73– 79
De Simone, C., Lifting facets of the cut polytope (5) 341–344
Delbrouck, L.E.N., Interdeparture times in M/G/1 queueing systems with non-preemptive priority discipline (1) 65– 69
Desrosiers, J., *see* A. Langevin (2) 127–132
Dietrich, B.L. and L.F. Escudero, Coefficient reduction for knapsack-like constraints in 0–1 programs with variable upper bounds (1) 9– 14
Dijk, N.M. van, Simple performance estimates and error bounds for slotted ALOHA loss systems (3) 175–180
Downey, P.J., Distribution-free bounds on the expectation of the maximum with scheduling applications (3) 189–201
Escudero, L.F., *see* B.L. Dietrich (1) 9– 14
Fayolle, G., *see* E.G. Coffman, Jr. (3) 141–146
Fischer, M.L., *see* K. Malik (1) 1– 7
Flippo, O.E. and A.H.G. Rinnooy Kan, A note on Benders decomposition in mixed-integer quadratic programming (2) 81– 83
Fraley, C., Linear updates for a single-phase projective method (3) 169–174
García-Palomares, U.M., A class of methods for solving large convex systems (3) 181–187
Gerchak, Y., Analytical comparative statics for the continuous review inventory model (4) 215–217
Gerchak, Y., *see* A. Grosfeld-Nir (6) 383–387
Ghosh, M.K., Markov decision processes with multiple costs (4) 257–260
Gilboa, I., E. Kalai and E. Zemel, On the order of eliminating dominated strategies (2) 85– 89
Glasserman, P., Discrete-time 'inversion' and derivative estimation for Markov chains (5) 305–313
Golany, B., *see* J. Barzilai (6) 407–410
Goldsman, L. and P.T. Harker, A note on solving general equilibrium problems with variational inequality techniques (5) 335–339
Gonzalez, J., Sparse dual transportation polyhedra: Extreme points and signatures (2) 115–120
Gottlieb, E.S., Facet defining inequalities for the dichotomous knapsack problem (1) 21– 29
Grosfeld-Nir, A. and Y. Gerchak, Multiple lotsizing with random common-cause yield and rigid demand (6) 383–387
Gupta, S.K. and A.P. Punnen, *k*-sum optimization problems (2) 121–126
Gupta, S.K., *see* K. Malik (4) 283
Hammer, P.L., *see* E. Boros (2) 73– 79
Harker, P.T., *see* L. Goldsman (5) 335–339
Hassin, R., An algorithm for computing maximum solution bases (5) 315–318
Ho, Y.-C. and J.-Q. Hu, An infinitesimal perturbation analysis algorithm for a multiclass G/G/1 queue (1) 35– 44
